

Mohem Token (MOH) Whitepaper

Empowering Communities through Blockchain Innovation

About Mohem Token (MOH)

Mohem Token (MOH) is a pioneering BEP-20 token on the BNB Smart Chain, crafted to enable swift, low-cost micro-payments, deliver accessible blockchain education, and cultivate a rewarding Play-to-Earn (P2E) ecosystem. Our vision is to empower local businesses, newcomers, and developers by offering practical cryptocurrency tools, transparent governance, and engaging incentives.

Our Three Pillars

- **Low-Fee Micro-Payments:** Mohem Token facilitates seamless, cost-effective transactions for local businesses via a lightweight merchant API and QR-based invoicing system, harnessing the BNB Smart Chain's efficiency for rapid settlement.
- **Practical Blockchain Education:** We provide a structured learning portal in English and Persian (Farsi), featuring step-by-step courses and NFT-based completion certificates, making blockchain accessible and rewarding for newcomers.
- **Play-to-Earn Ecosystem:** Our P2E platform offers web and mobile games with MOH rewards, enhancing user engagement and supporting developers through bounties and grants.

Security and Transparency

Mohem Token emphasizes trust and accountability. Our smart contract includes role-based controls, optional pause functionality, and multi-signature treasury management. Liquidity pools on PancakeSwap and ApeSwap are locked for 12 months, with transaction hashes and locker links published on our Transparency page. Team allocations follow a 12-month cliff with an 18-month linear release, while marketing allocations adhere to a 6-month cliff with a 12-month linear release. A two-phase audit plan features an initial audit by a reputable tier-2 firm (e.g., Hashex, Dessert, or TechRate) followed by a comprehensive audit by CertiK or SlowMist, with all reports publicly available.

Token Utility and Governance

MOH serves multiple purposes:

- **Micro-Payments:** Simplifying merchant transactions with low-cost, efficient settlements.
- **Education Access:** Unlocking course discounts and exclusive NFT credentials.
- **P2E Rewards:** Earning tokens through games and tournaments with anti-cheat mechanisms.
- **Governance:** Enabling community-driven decisions on burns, grants, and protocol parameters via a decentralized autonomous organization (DAO).

Roadmap and Vision

Our roadmap for 2025–2027 includes launching a QR payment MVP, an education portal with initial lessons, a P2E web beta, and DAO voting functionality by 2025. By 2027, we aim to expand with local payment service provider partnerships and cross-chain capabilities, driving adoption and scalability.

Commitment to Community

Mohem Token is built with community at its core. Our Transparency page provides verifiable links to contract details, liquidity locks, audit reports, treasury wallets, and monthly progress reports. We engage with our community through Telegram (t.me/MohemToken), X ([@mohem2096092](https://twitter.com/mohem2096092)), LinkedIn (linkedin.com/in/mohem-token), Facebook (facebook.com/mohem-token), and other platforms, fostering open communication.

Team Information

As the sole founder and developer of Mohem Token, I am committed to transparency and open-source development. My professional profile is available on LinkedIn (linkedin.com/in/mohem-token), and I am reachable at info@trustwdu.com. Currently operating independently, I am actively seeking collaborators to strengthen the project team, with plans to expand as the project grows.

Token Details

- Name: Mohem Token
- Symbol: MOH
- Chain: BNB Smart Chain (BEP-20)
- Decimals: 18
- Contract Address: [0xA041a7FD24D59d6E1e5D3c80044264F7eD3D8121](https://bscscan.com/address/0xA041a7FD24D59d6E1e5D3c80044264F7eD3D8121)

- Total Supply: 1,000,000,000 MOH
- Price: 1 MOH = 1 USD (public sale)
- Listed on: PancakeSwap (pancakeswap.finance), ApeSwap (apeswap.finance)

Conclusion

Explore our Whitepaper, Transparency page (tejaratpol1402.github.io/mohem-token), or connect with us on PancakeSwap to join the Mohem ecosystem.
